

About Us

Ecodyne Industrial has been a basic manufacturer of water quality improvement systems since 1956. The company specializes in providing solutions to the water problems of industry, institutions and commercial businesses throughout the world. Ecodyne Industrial has the in-house expertise to design and manufacture many different types of water treatment systems; from a simple water softener to complete complex high purity systems. Our Applications Engineering will put together a water treatment system to meet your exacting requirements.

The products consist of:

- Backwashing Filters
- Softeners
- Chloride Anion Dealkalizers
- Two-Bed Deionizers
- Mixed Bed Deionizers
- Reverse Osmosis Systems
- PEDI Tanks
- ASME Pressure Vessels
- Fiberglass Pressure Vessels
- polybond® Pressure Vessels
- Stainless Steel Pressure Vessels
- Carbon Steel Pressure Vessels
- Re-pressurization Systems
- Storage Tanks
- Neutralization Systems
- Forced Draft Degasifiers
- Ultraviolet Sterilizers
- Skid Mounting
- Pre-piping and Wiring
- NEMA Rated Control Panels
- PLC Controls
- Chemical Pumps

Technical assistance can be provided during the installation and start-up of a system, as well as on going technical service support. Technical training schools are held on a regular basis to provide the knowledge and technical information required to install and maintain the water treatment equipment manufactured and supplied by Ecodyne Industrial.

Ecodyne Industrial has a unique modular approach, providing the flexibility to custom design systems with standard mass produced components to meet a wide range of user water treatment needs and space requirements.
